Betreff: Re: CONTREC offer 210614-3

Hi Claudio,

The train I normally get was cancelled, so I am running a little late today. I should be at the office a few minutes after 9. Sorry for the delay.

Cheers,

Eliza

Hi Claudio,

If it's easy for you, let's meet in person. The address of my office is Turnerstrasse 1, 8092 Zürich. You can phone me (076 749 1871) when you get there so I can let you in to the building.

Zoom is fine though if it's a long trip for you.

Cheers,

Eliza

Hi Eliza,

Thursday the 23rd at 9 is perfect.
I will go with what you prefer. On site or by zoom.

Cheers,

Claudio

Betreff: Re: CONTREC offer 210614-3

Hi Claudio,

Yes, Thursday the 23rd at 9 or at 12 would be great, is that possible for you?

We can also meet by zoom; I don't have much in the lab at the moment, the experiments will be in a field site in Kenya in the end.

Cheers,

Eliza

Dear Eliza,

Thank you for your reply.

Unfortunately I will be out of the office next week from Monday to Wednesday but if you are available on Thursday I will be happy to come by.

Best wishes,

Claudio

Dear Herr Müller,

It would be great to discuss and learn more about the devices. Unfortunately this week my calendar is very full already, but next week would be great. Do you have time on Monday at 13:00? If not, let me know when would suit you better.

Best wishes,

Eliza

Subject: AW: CONTREC offer 210614-3

Dear Eliza,

Thank you for contacting me again.

I would like to present the devices to you.
If you like we could discuss the setup and configurations of the MFCs at your site.
15./16.06.2022 I could be there some time between 13:30 and 16:00.

The quotes I will start to prepare.

Best regards,

Claudio

Betreff: Re: CONTREC offer 210614-3

Dear Herr Müller,

I am writing to you again because the project for which I needed MFCs was funded and is beginning, so I would be glad to get updated quotes for the parts I was interested in.

You can see the initial quote below: I am interested in mass flow controllers for air (most synthetic air with near-ambient N₂O concentrations) with a range up to 500 mL / minute, which I will connect to a PC via an ICP-Con, and control via LabView. It would be great if you can send me a quote for 2 of these including taxes and shipping, and let me know if the unit price is similar also for 3 pieces.

Thanks for your help,

Eliza

Dear Ms Harris

Thank you for your inquiry.

I have one question before I will prepare your offer.
Wow would you like to run the smart controller GSC?
With PC or analog?

Best regards,

Claudio Müller
